SCIENCE OF LIFE - Reel VI.

How Disease is Spread. ✓

A series of dramatic episodes, showing how bacterial infection is transmitted through promiscuous use of drinking glass and eating utensils, moistening fingers with lips or tongue in counting money, turning leaves of a magazine, etc., and through sneezing and coughing, etc. Animated map of United States, showing spread of infectious disease from coast to coast, through disease carriers. Necessity of careful habits, and the proper cleaning of all raw foods.

This document is from the Library of Congress  
“Motion Picture Copyright Descriptions Collection,  
1912-1977”

Collections Summary:

The Motion Picture Copyright Descriptions Collection, Class L and Class M, consists of forms, abstracts, plot summaries, dialogue and continuity scripts, press kits, publicity and other material, submitted for the purpose of enabling descriptive cataloging for motion picture photoplays registered with the United States Copyright Office under Class L and Class M from 1912-1977.
